Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In the prior restriction requirement, applicant elected the subcombination and corresponding method of Group I; and the combination of Group II, claims 16-23 and 38-43, was withdrawn.

However, because of applicant's amendments to the claims, the following restriction requirement within Group I (between the subcombination and the method) now applies.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group 1a: claims 1-8, 10-12, 14-15, 25-27, 29-31, 33-35, 37 and 44-45, drawn to an apparatus for handling filter disks, classified in class 210, subclass 237.
 - II. Group 1b: claims 24 and 28 drawn to a method for handling filter disks, classified in class 210, subclass 542.
2. The inventions are distinct, each from the other because of the following reasons:
 - Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of Group 1b can be practiced by another materially different apparatus, e.g. one that does not require the adapter member having a sealing structure operatively positioned on the outer surface of the adapter member for removably, sealingly interfacing with the inner surface of the liquid outlet of the apparatus of Group 1a.

Art Unit: 1723

- Restriction for examination purposes is proper because of the reasons given above and also because (i) they have acquired a separate status in the art as shown by their different classification, (ii) the search required for the respective groups is not necessarily required by each of the other groups, and (iii) their subject matter is recognized as divergent.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

If applicant decides to elect the method of Group 1b, he may wish to include arguments as to why claim 24 is allowable over the art of record—in order to have a complete response to the prior office action—since such is missing from the arguments filed 6-29-2005.
